

Save on Credit Card Fees with InterPayments & Esker

Esker, the leading AI Automation Suite for the Office of the CFO, offers Source-to-Pay and Order-to-Cash solutions built to optimize working capital and cashflow, enhance decision-making, and drive smarter growth strategies. As a Managed Surcharge Provider, InterPayments seamlessly integrates with Esker's payment platform to enable compliant surcharging – increasing savings without disrupting the customer experience.

Guaranteed compliance

InterPayments' solution offers full compliance with all regulations within the U.S. and Canada, backed by contractual indemnification.

Precise surcharging

We utilize a multi-sourced card database to apply surcharges with precision, eliminating the need for merchants to manage complex and often conflicting card network rules.

Customer focus

Surcharges are clearly disclosed to customers before they complete payment, ensuring full transparency and trust.

How it works

- 1 The customer initiates a payment on Esker's payment platform using an eligible credit card.
- 2 InterPayments calculates the surcharge in real time based on the transaction details.
- 3 The surcharge amount is clearly disclosed to the customer before the transaction is finalized. The customer is given the option to accept the surcharge and proceed with the payment, or to choose an alternative payment method that does not incur a surcharge.
- 4 If the customer chooses to pay by credit card, the transaction and surcharge details are recorded in both Esker's payment platform and the InterPayments Portal.

Example recovery case

Surcharged revenue	Fees recovered	Percentage of fees recovered	Payback period
\$25 million	\$567,000	94%	3 Weeks
